**Subject:** Microsoft Settlement

I think the Microsoft case should be settled. What better way to have something positive comes out of this. Just think of how many children's lives could be changed if they had access to a computer. One billion in funding, software and training would make a huge difference in our classroom for the better. Just my opinion, for what it is worth. I am a grandmother with several grandchildren in grade school. Sure would like that benefit for them.

Sincerely,  
Jan Miller
